Product Selection Chart

Name of the Products	Normal Plasticizer M20 grade Concrete	Normal Plasticizer with Retarder M20 Grade	M25 to M40 Slump Retention Concrete	M25 to M40 grade Flow Concrete with Retention	M40 to M50 Grade Slump Retention Concrete	M40 to M50 grade SCC Concrete with retention	Grade M60 and Above Slump retention Concrete	Viscosity Modifying Agent for SCC & Flow Concrete	Grade M40 and Above Slump retention for 6Hr to 10 Hrs	Grade M60 and above SCC Concrete	Precast Concrete for Tiles, small precast segments	Acclerator for normal concrete	Acclerator for Spray Concrete	Non Costic Powder Acclerator	Silicate based chloride free acclerator	Foaming agent to Produce light weight concrete	Under Water Admixture	Surface Retarder	Solid Block Admixture	AirEntraining Admixture	Plasticizing and Air Entraining	Bi-polar Corrosion Inhibiting admixture	Nitrite based Corrosion Inhibiting admixture	Waterproofing admixture	Rolar Compacted Concrete Admixture	PQC Concrete	High range water reducer for PQC Concrete	High early strength Concrete with normal Slump	High Strength Concrete-SCC with Retention	Precast Concrete-with Retention	mortar Plaster
Normal Plasticizer																															
Conplast P211	■																														
Conplast P505	■																														
Conlast PA21S																					■										
Conplast R																									■						
Conplast RP264		■																													
Super Plasticizer - SNF based																															
Conplast SP430	■	■	■																												
Conplast SP430 P	■	■	■																												
Conplast SP 430 G8			■																												
Conplast SP430 ES2			■																												
Conplast SP430 SRV			■																												
Conplast SP500KL			■																												
Conplast SP439			■																												
Conplast SP600			■		■																										
Conplast SP430 KRM6			■																												
Conplast SP430 ITPQ																										■					
Super Plasticizer - PCE Based Admixture																															
Auramix 400					■		■	■		■																					
Auramix 403					■		■	■		■																					
Auramix 350			■																												
Auramix 350 PQC																										■					
Auramix 403 PQC																											■				
Auramix 403			■		■																										
Auramix 300			■		■																										
Auramix 300 Plus						■				■																					
Auramix 450				■		■				■																					
Auramix 500							■	■																							
Auramix 500 SRV									■																						
Auramix 200		■	■																												
Auramix 201		■	■																												
Auramix V100 / V200								■																							
Auracast 50											■								■												
Auracast 100																												■			
Auracast 102																												■			
Auracast 270M																														■	
Auracast 404																													■		
Auracast 405																													■		
Concrete Acclerator																															
Conplast NC												■																			
Sprayset HBL													■																		
Sprayset SL															■																
Conplast UW																	■														
Conplast UWL																	■														
Sprayset HBP														■																	
Mortar Plasticizer																															
Cebex 112																															■
Block Admixture																															
Conplast SD110																			■												■
Corrosion Inhibiting Admixture																															
Auramix BCI																						■									
Conplast CN																							■								
Waterproofing Admixture																															
Conplast WL Xtra																								■							
Conplast WP90																								■							
Air Entraining Admixture																															
Conplast AEA																				■											
Light weight Concrete																															
Conplast F297																■
