

1. Honeycombs

Description :

Honey combs are exposed aggregates which are formed on concrete surface due

- Improper compaction of concrete during placing
- Excess Water in mix
- Leaky Shuttering
- Improper Mix ,etc

Fosroc's Constructive Solution :

Renderoc SP40 - Shrinkage controlled, polymer modified, fibre reinforced cementitious repair mortar

Uses & Advantages:

- High strength
- Can be applied by hand, like conventional mortars
- Extremely low permeability provides maximum protection against carbon dioxide and chlorides
- Excellent bond to the concrete substrate
- Shrinkage compensated
- No site batching required, supplied in pre-weighed prepacked condition
- Only addition of water at site

Coverage / Dosage: 1.3 sqm at 10mm thickness

Packaging: 25 kg powder & 0.25kg polymer
