THE PROJECT

Built in 1984, Parkway Parade is one of Singapore's first major and biggest suburban malls nestled in the east.

Parkway Parade attracts visitation of over 1.5 million people per month, making it one of Singapore's busiest suburban shopping centres

The shopping mall has 1,201 parking lots over 6 floors covering 44,000 Square meters.

The building has gone through major refurbishment starting in March 2002 and works were completed in November 2003.

THE SOLUTION

We've introduced to the customer our Green Labelled Nitoflor FC150 which suits the client's requirements.

The product, solvent free, epoxy resin coat - provides a hard wearing, chemical and abrasion resistant floor finish suited for use in the car park where it is resistance to a high degree of resistance to chemicals, oils and grease. The product's fast curing time also met the customer's requirement of minimal disruption to ongoing trade activities.

The range of colours offered improves the identity of parking lots and hazard areas.

THE BENEFITS

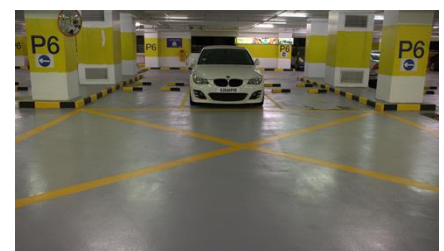

Fosroc has provided high value product performance and quality solutions that facilitates multi-storey car park that benefit client's business.

The product is hard wearing, durable and low maintenance cost. The impervious finishes provides easily cleaned surface. Nitoflor FC150 is odourless and solvent free hence making it safe to work in the basement car parks.

Participation in contributing towards the "Green Mark" awareness program in the local building community through certification of qualified "Green Label" products system.
