- Nitobond SBR Latex
- Cebex 100, Conbextra GP2
- Conbextra EP10

THE PROJECT

Hiranandani Group is a premium real estate developer in India with more than 40 years of experience in the industry. Hiranandani Solus is a brilliantly planned structure for all business types. It is an upmarket, condominium-style commercial & residential project built in the city of Thane, Mumbai.

THE SOLUTION

As the client is very quality conscious, they asked for a waterproofing coating free from pitch. As a world leader in providing constructive solutions, Fosroc suggested Nitoproof 600 PF, a single component, liquid applied, elastomeric, pitch-free polyurethane waterproof coating which provides a continuous, seamless, water- and vapor-proof membrane for concrete.

THE BENEFITS

The client was satisfied with our performance and the quality of the product pertaining to its technical features, as described below:

- Pitch-free polyurethane system, non-toxic in nature
- Elastomeric waterproofing membrane with higher elongation properties
- Single component, making application easy; can be applied either by roller, squeeze or spray, and requires no special equipment
- Capable of bridging substrate cracks up to 2mm, ideally suitable for larger or open area applications like podiums and terraces.
